POLAR TECH'S RIGID COLD PACKS

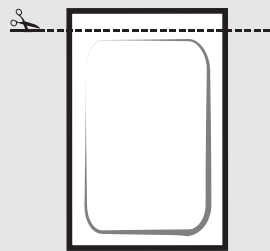

INSTRUCTIONS

TO RECYCLE

2.

cut

3.

dispose foam,
recycle plastic

TO DISPOSE

dispose
whole pack

RE-FREEZ-R-BRIX®

REUSABLE • HIGH QUALITY • MADE IN USA

What's inside the pack?

A rigid piece of foam, similar to the type of foam used in floral arrangements. It's soaked in a solution that's 97% water and 3% non-toxic refrigerant.

Can I reuse the pack?

Yes, reuse as long as the pack is intact. Freeze for at least 24 hours before use. The pack can also be refrigerated to suit your preferences.

How can I recycle it?

While the entire pack isn't recyclable, one component is. The outer plastic case is #4 recyclable. Cut open the pack, dispose the foam in the trash, and rinse and recycle the plastic.

I have too many packs, what can I do with them?

Make sure the packs are free of leaks, then consider donating them to school districts, food pantries, or to community events.
