POLAR TECH'S FOAM COOLERS

TO REPURPOSE

IDEAS AT HOME

Repurpose a foam container as a planter in a garden. Cut holes in the bottom for drainage, add broken foam pieces, and a mix of soil and compost on top. Place the whole container on bricks to allow drainage.

Reuse a foam container to hold and insulate groceries.

Compost in foam containers.

Make a planter box.

HELPING ANIMALS

For cats in colder climates, an insulated outdoor shelter can provide comfort. Cut a hole at the bottom that's just large enough for their body, place a folded towel at the bottom for a bed, and use long screws to fasten the foam lid closed.

EPS FOAM: RECYCLED DAILY WITH GROWING ACCESSIBILITY

Do all recycling centers process EPS?

No. Though it is a #6 recyclable product, not all centers are equipped to do so. Please call you local recycling center to check.

Where's the nearest recycling center that accepts EPS foam?

FoamFacts.com is a great resource: <https://www.foamfacts.com/recycling/>
Type your zip code at the bottom right corner of the map to see results near you.
